

# LICA WATER MANAGEMENT FORUM

*Professionals planning for the future!*

**St. Joseph's College, Rensselaer, IN**  
**June 13 & 14, 2024**

Have you ever considered pursuing a career in the heavy construction industry? This sector presents abundant opportunities due to the substantial demand for skilled professionals, offering attractive benefits, job security, and prospects for career progression. With a job in the construction industry you can enhance your skills, generate income, and bypass the burden of college expenses.

## Introduction to Heavy Construction Equipment Friday, June 14 - 9:00 am

This three-hour session is a wonderful exploration of heavy equipment operation and the construction industry. It will begin with an introduction video to the Land Improvement Contractors of America and discussion of the various career opportunities within the construction field.

- An overview of a career as a heavy equipment operator & other available construction jobs.
- Insight into salaries & benefits within the industry.
- Hands-on experience with an equipment simulator to provide a feel for operating equipment.
- An overview of the variety of equipment used in construction & their functions.
- The opportunity to attend any educational seminars scheduled for that day.
- Visit indoor & outdoor exhibits for hands-on experience using actual equipment.
